# CCS 1 – FINAL PROJECT

Time: November 22 – December 6 [2 weeks]

Group of 2 members

1. Create a website which incorporates all your topics we covered: HTML, CSS, JAVASCRIPT, PHP

2. **LOGIN PAGE: (*filename: index.php*)**
   Create a login page using PHP. Ask for username and password.
   The <u>username input</u> must be displayed in the succeeding pages. Use a session variable to do this.

3. **HOMEPAGE (*filename: home.php*)**
   Design a homepage using HTML, CSS and JavaScript.
   Design the page layout using HTML and CSS.
   When a user clicks on button, add an interaction using Javascript.

4. **HOMETOWN (*filename:hometown.php*)**
   Decide among your group on whose hometown you want to feature.
   Add image/s and appropriate description of the place.
   Use HTML, CSS and Javascript.

5. **GALLERY (*filename:gallery.php*)**
   Add a gallery page using an HTML table or CSS positioning.

6. **CONTACT (***filename: contact.php***)**
   Create a contact page layout that includes a <u>form</u> and a <u>contact information.</u>
   Use HTML, CSS and JavaScript.

7. **LOGOUT BUTTON**
   Add a logout button to all the pages.
   When the user clicks <u>logout</u> delete the session in PHP

8. **DIVIDE THE TASK EQUALLY AMONG MEMBERS**
   Decide among the group on the task division. Tasks must be divided equally.
   There will be a peer-to-peer evaluation after project submission.

9. **PROJECT CHECKING:**
   Checking of the project will be done in the lab on December 6. All members must be present.
